

FEATURES OF HUMAN GAMETES

Human ovum observed through microscope
(SVT 4^e, Didier 2007)

Human spermatozoon observed through electronic microscope
(SVT 4^e Hachette 2007)

- 1) **Draw a scientific drawing** of human spermatozoa respecting the success criteria of an observation drawing.
- 2) **Asses yourself your drawing** : verify whether you have respected each of the success criterion and modify your drawing if not.

Success criteria

Drawing

The drawing is made only with pencil	The line is thin and continuous	There is no crossing out or rubber track	The drawing is centered	Forms and proportions are respected	The important features are well drawn

Caption

Arrows are drawn with the ruler	Arrows don't cross themselves	The return lines are horizontal or vertical	There is a caption for all important features	The title fits well	There is no spelling mistake	The observation mode and the enlargement are written

- 3) Complete the following table:

CHARACTERISTICS OF GAMETES	MAN	WOMAN
Name of gametes		
Size		
Shape		
Motility
